EXPERIENCE

As a front-end developer and UI designer, I focus on the user experience of a web page. I work with HTML, CSS, JavaScript, Next.js, and Figma to ensure the interface is intuitive and user-friendly. I pay close attention to details like color, layout, and typography to create an aesthetically pleasing experience. I also optimize the performance of the interface to ensure that it loads quickly and smoothly on all devices.

I collaborate with designers and back-end developers to create the best possible user experience. I also test my code in different browsers and devices to ensure that it is accessible and responsive on all platforms. It's my goal to create a delightful experience for users.
